Rimless option is also available

Nu-Air XDT Tires are also available in Orange non-marking rubber compound

NO FLATS EVER!

With **Nu-Air[®]** tires you'll never waste time and money on flats. Nu-Air integrates the strength and stability of a solid tire with the smooth, cushioned ride of a pneumatic tire.

McLaren's unique Semi-Pneumatic Tire Technology™ provides shock absorption for maximum performance and machine longevity on and off road. The specially engineered sidewalls prevent cuts and snags even in severe cutting conditions. The deep tread pattern provides more traction on slopes, sand, mud, and other slippery terrains. Made from heavy-duty rubber compound, Nu-Air tires last three to five times longer than regular pneumatic tires.

McLaren's new **Maximizer™** Series is our most cost-effective flat-proof tire solution. Combining the benefits of Semi-Pneumatic Tire Technology with the big cost advantages of lean tire manufacturing, Maximizer tires offer great quality at a great price. They are the perfect solution for the budget conscious contractor, who needs to get a job done on time, while incurring the lowest possible project costs.

- The industry standard for quality with unsurpassed longevity and wear-resistance
- Three to five times the life expectancy of pneumatic tires with no downtime from flats
- Up to three layers of sidewall holes for a smooth, air-cushioned ride
- Different tread designs available to match various terrains
- Rims included for easy installation
- Rimless replacement tires available for additional savings
- Works great with McLaren over-the-tire tracks
- Non-marking Orange XDT tires also available
