

PROTRAC™ series High Performance Skid Steer Tracks

MAXIMIZER™ series Over-the-Tires Tracks

PROTRAC RUBBER

PROTRAC MAGNUM

PROTRAC DIAMOND

MAXIMIZER OTT

With **Protrac** you can go where no skid steer has gone before! You can do jobs that would otherwise require a track loader or even a dozer. Protrac lowers the machine's center of gravity for improved stability, along with added traction.

MCLAREN OTT - COMPARISON TABLE

	Skid steer	✓	✓	✓	✓

Interchangeable Magnum and Rubber pads

Orange non-marking rubber pads for Protrac Magnum/Rubber are also available

GET ON TRACK!

McLaren Over-the-Tire tracks systems are built with manganese-enriched steel alloy, the type of tough alloy used in bucket teeth and other demanding applications.

The links and pins are made of forged chromium-enriched steel, and are heat-treated for superior strength. McLaren skid steer loader tracks deliver unmatched flotation, traction, and tire protection. They are easy to install and inexpensive to maintain.

McLaren offers four types of OTT systems:

- **PROTRAC Diamond™** bites into mud, clay, loose rock, snow and ice like no other type of track.
- **PROTRAC Magnum™**, the toughest track on the market, has more pushing and pulling power, and is perfect for jobs like demolition and land clearing.
- **PROTRAC Rubber™**, the most versatile track, has great traction and flotation; its rubber shoes are gentle on turf, asphalt, and many other surfaces.
- **Maximizer OTT**, McLaren's most cost effective system yet; made from corrosion-resistant heat-treated steel, and featuring an innovative "hexagon" self-cleaning cross-bar design.

- McLaren is the undisputed leader in over-the-tire track systems
- Maximum traction on any job
- Exceptional flotation in mud & sand
- Heat-treated, hammer-forged pins and links
- Easy to install; fully rebuildable, and inexpensive to maintain
- Interchangeable Magnum and Rubber pads increase versatility
- Hardened and crafted with specially formulated steel, not cast iron
- Rubber pads are safer on asphalt, driveways, gardens and lawns
- Rubber pads also available in Orange non-marking compound
